arr_cycle_id	number		Pseudo arrest cycle ID -- a numeric value representing an arrest event cycle that is associated with one or more cases. arr_cycle_id is attached only if the current docket is matched to a criminal arrest record in the DCJS data	

*Note on Prior/Rearrest:

- Criminal history data are provided by DCJS as of June 21, 2024. DCJS criminal history data are limited to arrests for misdemeanor or felony offenses that required fingerprints to be taken.
- Cases arrested for non-fingerprintable misdemeanor charges are not included. Charges that require fingerprints to be taken can be found in the Coded Law File on the DCJS website (<https://www.criminaljustice.ny.gov/crimnet/ccman/ccman.htm>). The "Printable" field indicates whether the charge requires fingerprints to be taken.
- DCJS variables with a missing value indicate that the respective case has no matching records present within the DCJS criminal history repository, not that the case has no criminal history.
